LAND FORCES TRADE SHOW

We had an incredible opportunity to participate in the "largest defence exposition ever held in Australia," with 995 exhibiting companies from 31 countries around the world.

Our team was able to showcase our scanning and metrology products from API, Scantech, Kreon and Geomagic. The irrefutable success of this event led to strong new partnerships and many informative conversations.

Thank you to everyone who stopped by our booth. We look forward to working together!

TRADE SHOW HIGHLIGHTS

NIMBLETRACK

The new 3rd-generation NimbleTrack 3D scanner piqued significant interest with its wireless, portable design, offering a seamless and precise 3D scanning experience. Our hands-on display allowed attendees to experience its capabilities first hand, demonstrating how NimbleTrack redefines accuracy in 3D measurements.

With target-free scanning, high portability and exceptional precision, NimbleTrack is setting a new standard in 3D scanning technology

HENTY & ELMORE FIELD DAYS

Our recent participation at the Henty and Elmore Field Days was a fantastic opportunity to connect with the agriculture community and shed light on some of our tools.

With ideal weather at both events, we had an excellent turnout and engaged with a wide range of attendees, from families to industry professionals.

These events played a pivotal role in introducing our JackJaw and Metsys product range to those who benefit most from our solutions.
